

Market Update – Heat Pump Next Generation

We're pleased to announce the newest addition to the Dux Airoheat and Radiant heat pump ranges. These models take advantage of the latest product developments and offer increased performance and greater installation versatility.

Importantly, the Radiant heat pump now comes as a plug in unit.

New Model Numbers

Dux Hot Water heat pump – D2FHG4HW0C – Hard-wired model only

Radiant Hot Water heat pump – R2FHG4FP0C – Flex and Plug model only

Product Improvements

These models incorporate the latest heat pump improvements from Dux.

- increased hot water delivery due to new inlet diffusion technology
- improved lid design for rapid drainage in high rainfall areas
- outstanding IP7 water proof rating of Hotlogic controller
- easy access to both anodes for ease of maintenance
- improved hot water recovery time
- improved thermal efficiency, less heat loss due to fully insulated storage tank and refrigeration system
- a 50mm reduction in height to allow for more compact installations
- composite condensation tray
- improved airflow dynamics
- fully compliant to new, tougher standard.

STCs

Both models conform to the new, tougher heat pump methodology under AS/NZS5125.1:2010 and have been modeled to the Version 14 ORER round due to be released next month. Dux will trade STCs on these new products immediately.
