

**ISSUE DATE:** 23rd March, 2011

**SUBJECT:** Voltage Description of Electric Storage Water Heater Rating Labels

This bulletin has been issued to notify a print error which occurred on 3959 Aquamax electric storage water heaters manufactured between Jan-11 and Feb-11.

Electric storage rating labels printed from the 17<sup>th</sup> Jan 2011 had incorrectly specified the Voltage as **3.6 Vac**. This has been rectified back to **240 Vac** as of the 23<sup>rd</sup> Feb 2011. Please see **Diagram 1** for the label correction.

**Diagram 1: Rating label correction**

Model No. E250T36		
<b>RATED DELIVERY</b> <b>250</b> Litres  Storage Capacity 260 Litres	Maximum loading	3.6 kW
	Heating Element(s)	3.6 kW
	Voltage	3.6 Vac
	Max Working Pressure	1000 kPa
	Pressure & Temp Relief valve	1000 kPa
	Relief valve power	10 kW
	Supply Pressure (Max)	850 kPa
	Thermostat Setting (Max)	75 °C
	Vitreous Enamel Cylinder	
	Protection rating	IPX4
Water Mark No.	WMKA00200	
Approval No.	V07072	
Date of Manufacture	Feb-11	
Serial No. <b>4060040-003610</b>		

**INCORRECT LABEL**

Model No. E250S36		
<b>RATED DELIVERY</b> <b>250</b> Litres  Storage Capacity 260 Litres	Maximum loading	3.6 kW
	Heating Element(s)	3.6 kW
	Voltage	240 Vac
	Max Working Pressure	1000 kPa
	Pressure & Temp Relief valve	1000 kPa
	Relief valve power	10 kW
	Supply Pressure (Max)	850 kPa
	Thermostat Setting (Max)	75 °C
	Vitreous Enamel Cylinder	
	Protection rating	IPX4
Water Mark No.	WMKA00200	
Approval No.	V07072	
Date of Manufacture	Feb-11	
Serial No. <b>4050040-033301</b>
