## Introducing our latest IT BBQ Range

This modern, stylish range of BBQs is sure to impress with its unique burner system and high heat cooking performance guaranteed to serve up perfectly seared meats and vegetables each time, every time.

**integrill™**  
less gas, more heat, better performance

The unique porcelain enamel cast iron burner system comprises of an angled **Integrill** grill plate allowing fat to drip down the sides during cooking and a smooth, searing **Plancha** hot plate with raised sides for convenient turning of food. This system means that no flame tamers are required by design thereby using less gas to cook, and allowing a more direct heat for optimum cooking performance.
